

SYMPOSIUM ON BIOETHICS IN A POST-COVID WORLD

Covid-19 has potentially changed the world as we know it. As the World Health Organization desperately urges countries to consider and address the health impacts of long-Covid, some countries are still struggling to mitigate the pandemic and/or suffering the economical and psychological effects of the responses to the virus. This symposium aims to consider the potential bioethical implications, dilemmas, and role in a post-Covid world. It will examine, for example, the role of international and national health organizations during Covid and future pandemics. It will also discuss how practices of solidarity played a part in individual and institutional responses to Covid and how they should play a role in future pandemics. The symposium will ultimately seek to understand how the world reacted to Covid, and how we might do better next time.

Main themes:

- **Autonomy, Paternalism, and Justice**
- **Social Determinants of Health and Related Inequalities**
- **Solidarity, Marginality, and Vulnerable Population**
- **Pandemic Preparedness Planning**

Registration

HKU members:

non-HKU members:

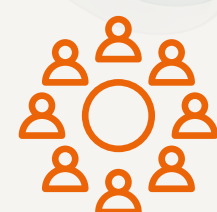

May 18, 2023
Thursday

9:00 AM - 5:45 PM
